

Quantum weak magnetic resonant analyzer

Directory

Product description:

Do you want to know your own overall health conditions? Without ultrasound scans without nuclear magnetic resonance, not blood tests or x - ray, as long as you holding the detector sensor, your hundreds of health data can be obtained in a matter of minutes. This is absolutely not science fiction plot, but the epoch-making high-tech quantum weak magnetic resonance analyzer.

Principle of Measurement:

The human body is the aggregates of a large number of cells which are in continuous growth, development, differentiation, regeneration and apoptosis, and the cells constantly self-renew through its own division. 25 million cells are divided at one second in an adult's body, and the body's blood cells constantly renew at the rate of about 100 million per minute. In the process of cell division and growth, those charged bodies of atomic nucleuses constituting atoms as the basic unit of cell and the electrons outside the nucleus are in constant high-speed movement and changing, thereby constantly emitting electromagnetic waves.

The electromagnetic wave signals emitted by the human body represent the specific state of the human body, and the emitted electromagnetic wave signals are different under the different conditions of the human body, such as

health, sub-health, disease, etc. If we can determine these specific electromagnetic wave signals, we can determine the status of the body's life.

Quantum medicine considers that the most fundamental reason of falling sick is that the spin of electrons outside the atomic nucleus and the orbit change, thereby causing the change of atoms constituting a material, the change of small biomolecules, the change of big biomolecules, the change of all the cells and finally the change of organs. Because the electron is a charged body, when the spin of electrons outside the atomic nucleus and the orbit change, the electromagnetic wave emitted by the atoms will change. The energy of the electromagnetic wave changes caused by the changes of the human body's diseases and physical changes in the nutritional status is extremely weak and usually is only nano gauss to microgauss. The frequency and energy of the weak magnetic field of hair determined directly or by holding a sensor by hand compare with the resonance spectra of standard quantum of diseases and nutrition indicators set in the instrument after the frequency and energy are amplified by the instrument and processed by the computer, and then the corresponding quantum value being from negative to positive is output. The size of the quantum value indicates the nature and extent of the disease and the nutrition levels. Finally, the test results are resolved by clinicians. For example, cancer cells are different from normal cells, and the electromagnetic waves emitted by cancer cells are also different from the electromagnetic waves emitted by normal cells. Quantum resonance testing tumor is to send the standard wave of cancer cells to the specimen. If there are cancer cells in the human body, resonance will occur, and the instrument will detect the signal. The more the number of cancer cells is, the more intense the signal is, and the quantum value tends to the negative value. If there are no cancer cells, resonance will do not occur, and the quantum value tends to the positive value. It's similar to the principle of listening to broadcasting from the radio. There are many radio waves in the air. If you want to listen to some designated

broadcasting, you can transfer the radio to the corresponding frequency, at this moment, resonance occurs, so that you can listen to this broadcasting.

Quantum resonance uses this principle for testing.

Test items:

Quantum weak magnetic resonance detection is an emerging rapid, accurate, non-invasive spectroscopic detection methods, especially suitable for comparative efficacy of medical treatment, acupuncture and Chinese medicine herbs treatment, health care products and sub-health check up.

Detection project:

cardiovascular, bone mineral density, trace elements , blood lead, rheumatism, lung, respiratory tract, nephropathy, blood sugar, stomach, liver and gall, cranial nerves, gynecology, prostate, bone disease, calcium and iron, zinc and selenium 30 test items., more than 100 pages of detailed reports.

Features:

Disease prophet: diseased cells only ten and detector will be able to capture weak change of diseased cells in the sub-health state ,forecasts incidence precursor, take care measures, can be effective in preventing a variety of chronic diseases.

Faster and more accurate: a few minutes to know the number of index of your body. The detection method can greatly save your time and effort.

Database check system is the use of the scientific method, to strict hygiene statistical processing, and a lot of clinical tests established the high detection accuracy.

Non-invasive painless: detected without blood tests or radiation, can be

learned that the body is currently in what state.

Convenient: The time returned to the patient. The cost of testing is appropriate, easy for the average consumer to accept.

Health Management: After your detect created for your personal health records by health care professionals develop health management program specifically for you to keep track of your health status, make your body more health, achievements in your career.

Prevent disease in the first place: regular inspection, to remind you to pay attention to the indicators, health status, disease prevention, and first place.
